PETITION TO MAKE SPECIAL UNDER 37 CFR 1.102(d)

MS Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Submitted herewith is a Petition to Make Special the above-identified patent application.

Attorney for the applicants hereby states that a prior art search was conducted by the European Patent Office on claims having the same or similar scope as to those in the present application. The European Patent Office searched the WPI Data, EPO-Internal, and PAJ databases under International Class IPC 7 G06F. From that search, the European Patent Office indicated that International Patent Application No. EP0650144 was the most relevant reference.

Copies of known references related to the claimed subject matter, including those identified in the search performed by the European Patent Office have been submitted to the PTO attached to Information Disclosure Statements filed on August 23, 2001, November 19, 2001, and July 8, 2004. Therefore, the most relevant known references have already been submitted to the Patent Office.

Applicants submit, herewith, a Preliminary Amendment amending claims 1-4, 6-9, 11-12, 16-19, 21, 24, 27 and 31. With respect to independent claim 1, the disclosed references, both independently, and in combination, fail to disclose, teach, or suggest a computer device,

having a processor, display and memory, that has a system for simulating tactile control over a document that includes:

- system code stored within the memory and adapted to be executed by the processor to provide a digital representation of a document including data content and a page structure representative of a page layout of the document;
- a rendering engine for rendering an image of at least a portion of the page layout of the digital representation on the display;
- a display monitor for detecting movement of an object across the display;
- an interface process for comparing properties of the detected movement to properties of a set of predefined movements associated with a set of user interface commands for manipulating and viewing documents to identify an input of a user interface command to alter the image, the identification of the user interface command being independent of visible elements on the display; and
- a navigation module for navigating through the digital representation of the document by changing the rendered portion of the page layout in response to an identification by the interface process of an inputted user interface command.

Accordingly, applicant requests that this Petition to Make Special be granted and the application undergo accelerated examination.

Please charge our Deposit Account No. 18-1945 in the amount of \$130.00 covering the fee set forth in 37 CFR 1.17(h) or (i). The Director is hereby authorized to charge any deficiency in the fees filed, asserted to be filed or which should have been filed herewith (or with any paper hereafter filed in this application by this firm) to our Deposit Account No. 18-1945, under Order No. PGLD-P01-003. A duplicate copy of this paper is enclosed.

Dated: July 9, 2004

Respectfully submitted,

By 

Edward A. Gordon
